**Invest in the future
of the energy transition today!**

Empowering Future Talents for a Sustainable Energy Future

The **Erasmus Mundus DENSYS Master's Program** is a prestigious international program that trains students from around the world to tackle the challenges of the energy transition. It brings together top academic talents in key disciplines: electrical, mechanical and chemical engineering.

Our mission: To offer these future experts the opportunity to study, regardless of their social or geographical background.

Why support DENSYS?

By becoming a sponsor, you:

- Enhance your corporate social responsibility by supporting talented students who are not eligible for European scholarships.
- Strengthen your brand image as a key player in energy transition innovation.
- Gain access to a pool of top young talents for internships, master's theses, and targeted recruitments.
- Promote cultural diversity and gender equality in the engineering field.
- Benefit from tax advantages (up to **60%** deduction if your company is based in France or Luxembourg).

Make a Real Impact on the Future

Since its launch, **DENSYS Master's Program** has trained over **70 students** from **45+ nationalities**, who are now employed in leading international companies. Your support will ensure equitable access to this high-level training and accelerate innovation in sustainable energy.

Choose Your Sponsorship Level *

Silver

5,000 € – 10,000 €

Visibility on our communication channels, participation in online job fairs, and access to graduate profiles.

Gold

10,000 € – 30,000 €

All Silver benefits + dedicated company conferences, internship/master's thesis opportunities with students' selection.

Platinum

30,000 € +

All Gold benefits + events co-branding (summer schools, graduation ceremony), students scholarships with the name of your company.

Cohort 2023-2025

Oluwanifemi Ojo

Specialisation track : energy to X, Innovative pathways for energy storage, PoliTo, Turin, Italy

The ID+ Lorraine Foundation scholarship was instrumental in continuing my journey as a student in the self-funding category of the DENSYS programme. It eased the financial burden, allowed me to focus on my studies fully, make the most of my international experience, and most importantly, helped me stay motivated in pursuing my dream career in decentralized energy systems

* The cost of a full scholarship for two years is € 52,000
